OLIVIA TURNER

oliviag.turner9@gmail.com • 240-552-6822• portfolio website

Immersive Media Design graduate with expertise in **Unreal Engine, Unity, and 3D modeling**. Experienced in building interactive VR platforms, narrative digital environments, and high-fidelity assets using C++, Maya, and TouchDesigner. Proven creator, problem solver, and collaborator who has delivered customer-driven design solutions. Seeking an entry-level **Experiential Designer** position to innovate at the intersection of spatial storytelling, immersive technology, and public engagement.

EDUCATION

University of Maryland — 2021 - 2026

Bachelor of Arts - Immersive Media Design — *GPA: 3.80*

- Honors College - Design, Culture, & Creativity
- Relevant Coursework: Virtual & Augmented Reality Development, 3D Modeling and Design, Interactive Design, Web Development, Creative Coding, Digital Storytelling

PROJECTS

ARTCHIVE - VR Art Preservation & Exhibition Platform — FEB 2025

Unreal Engine, Maya, C++, Oculus Meta Quest

- Conceptualized a virtual reality platform for emerging artists who need a more flexible way to preserve, organize, and exhibit artwork beyond the limits of physical storage
- Designed an immersive VR gallery allowing users to upload work, customize exhibition environments, and display pieces in a more engaging format than static online portfolios
- Built and presented a VR experience focused on interactivity, spatial storytelling, and the impact of experiencing art in a digital environment

Reliquary World - Unreal Engine Interactive Environment — OCT 2024

Unreal Engine, Maya, Photogrammetry, Material Design, Real-Time Rendering

- Conceptualized and developed a narrative-driven project transforming an everyday object into a digital “reliquary” using photogrammetry and real-time rendering techniques
- Developed an immersive 3D environment in Unreal Engine, integrating photogrammetry-derived assets, custom models, and dynamic lighting to support narrative-driven worldbuilding
- Captured and reconstructed a real-world object through photogrammetry, converting it into a high-fidelity 3D asset and recontextualizing it within an immersive environment

Google Design Consultant — FEB 2022

Adobe Illustrator, Adobe Photoshop

- Created the visual identity for a Google internal training summit by developing four logo concepts built around clarity, energy, and cross-functional collaboration
- Interpreted a fast-moving creative brief and turned abstract goals into branding directions that could work across presentations, internal communications, and event materials
- Produced final logo assets under a short turnaround, with the selected design used to represent the entire event across internal summit materials

EXPERIENCE

Gym Operations Lead & Program Instructor — 2023 - PRESENT

Movement Gyms - Rockville, Maryland

- Supported day-to-day facility operations by coordinating climbing sessions, organizing participant groups, and managing program schedules involving hundreds of participants
- Acted as a front-facing representative for the gym by problem-solving and ensuring an exceptional customer experience
- Managed multiple responsibilities in a fast-paced environment while maintaining attention to safety and assessing member needs

SKILLS

- **Software**: Unreal Engine, Unity, Maya, Blender, Adobe Photoshop, Adobe Illustrator, TouchDesigner
- **Technical**: JavaScript, C++, HTML, CSS, Python, 3D Modeling
